Wireframes and Screen Design: RAG-Diary

> The main screen layouts, the design principles, the colour and font tokens actually used, and notes on responsive behaviour and accessibility.

> Thai version: UI-WIREFRAMES.md

1. Document control

Item	Detail
Document	Wireframes and Screen Design
Version	1.0
Prepared	15 October 2026
Author	Business Analyst / System Analyst (project owner)
Status	Reviewed, round 1 (25 October 2026)
Related documents	USE-CASES, UI design tokens, NFR-SPEC

2. Purpose and scope

This document answers one question: which main screens exist, how is each one divided, and where are the key interactions? It gives the development and test teams a shared picture before the high-fidelity detail.

Scope: seven main screen layouts, design principles, the colour and font tokens, and accessibility notes. Two secondary screens, /user and /favorite, exist in the app but are not drawn: /user repeats account information already covered in settings, and /favorite is not enabled yet. Out of scope: high-fidelity images (see the running app) and component code.

Note: the labels in the wireframes are in English to keep the layout in a fixed-width font. The real interface ships in Thai and English, switched from the language control in the top bar or settings.

3. Design principles

- The Marginalia theme feels like a private notebook, built on paper and ink colours.

- Simplicity in writing comes first, because the main persona wants to write quickly without friction.
- The palette is warm but still has enough contrast for long reading sessions.
- Type is mixed: a serif for headings, a handwriting face for accents, and a readable face for body text.

4. Colour and font tokens

Token	Value	Use
pa-paper	#fbf6ec	Main paper background
pa-page	#fffdf8	Card and page background
pa-ink	#2a2620	Primary text
pa-rule	#e6dcc8	Dividers and borders
pa-margin	#c8553d	Primary accent and notebook margin
pa-inkblue	#2f5d8c	Links and informational state
pa-sticky	#fbefa5	Sticky-note callouts
pa-highlighter	#fff2a8	Text highlight
pa-kraft	#e7dcc6	Secondary surface
pa-pencil	#6b6357	Secondary text
pa-olive	#6b8e5a	Success state
pa-amber	#b9822e	Pending or warning state
pa-clay	#b4452e	Error state

Font	Role
Fraunces → Taviraj	Headings (Latin uses Fraunces, Thai uses Taviraj)
Caveat → Mali	Handwriting and labels (Thai uses Mali)
Fredoka	Logo and some badges
Nunito → Noto Sans Thai	Body text (Thai uses Noto Sans Thai)
Roboto Mono	Code and numeric data

The font stack lists Latin first and Thai after, so English text keeps its intended look while Thai text gets a face designed for it. Body line height is 1.75 and handwriting labels 1.35, so Thai upper and lower vowels do not collide.

5. Screen inventory

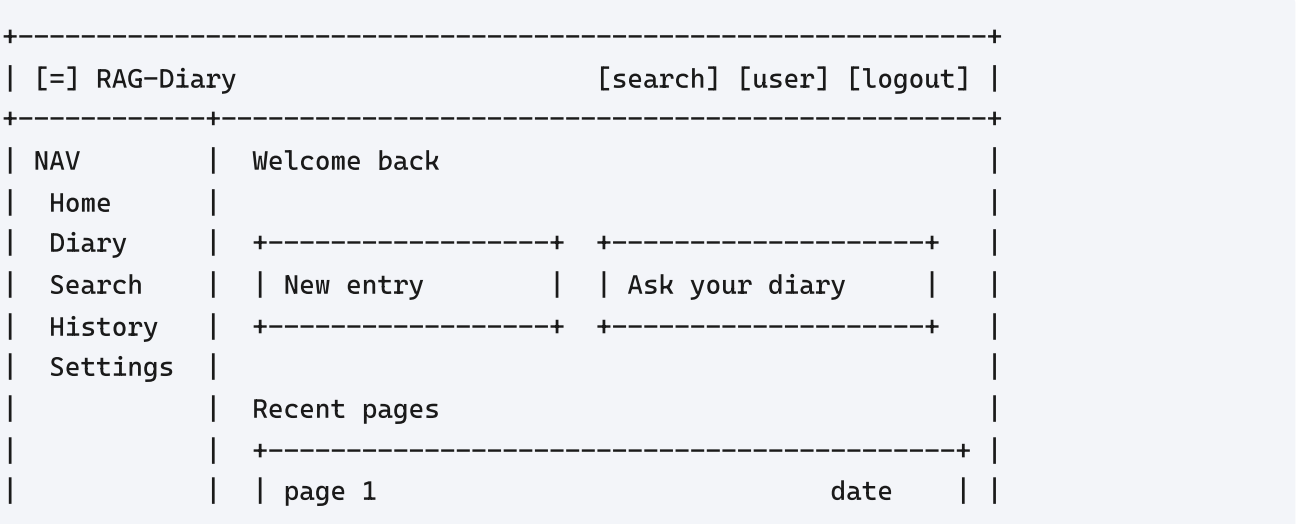

Screen	Route	Use case	Key interactions
Log in	/login	UC-01	Enter email and password, sign in, link to register
Register	/register	UC-01	Enter email and password, create an account
Home	/	UC-02, UC-03	Start-writing card, shortcuts, recent entries
Diary studio	/diary	UC-02, UC-05	Write, tag, summarise mood, generate an image
Search and chat	/search	UC-04	Type a query or question, see results and answers
Entry history	/historyBoard	UC-03	Browse, edit and delete entries
Settings	/setting	UC-06	Export data, delete all data, log out

6. Wireframes

6.1 Log in and register

6.2 Home

```
|            |  +-----------------------------------------+ |
|            |  | page 2                            date  | |
|            |  +-----------------------------------------+ |
+------------+-----------------------------------------------+
```

The left side is a collapsible navigation rail. On mobile the shortcut cards replace the rail for convenience.

6.3 Diary studio

```
+-------------------------------------------------------------+
| [=] Diary Studio                                  [user]    |
+-------------------------------------------------------------+
|  Write a new entry                                          |
|  +-------------------------------------------------------+  |
|  |  content ...                                          |  |
|  |                                                       |  |
|  +-------------------------------------------------------+  |
|  tag [________]                              [ Save ]       |
+-------------------------------------------------------------+
|  Magic Diary Studio                                         |
|  [ Summarize mood ]                                         |
|  Summary: ..............................................    |
|  prompt  [_________________________________]   [ Imagine ]    |
|  +--------------------+                                     |
|  |   image preview    |                                     |
|  +--------------------+                                     |
+-------------------------------------------------------------+
```

6.4 Search and chat

```
+-------------------------------------------------------------+
|  Search                                                     |
|  [ type a question or keyword ............... ]   [ Ask ]   |
+-------------------------------------------------------------+
|  Results                                                    |
|  +-------------------------------------------------------+  |
|  | entry content ......................... similarity 0.82|  |
|  +-------------------------------------------------------+  |
|  +-------------------------------------------------------+  |
|  | entry content ......................... similarity 0.74|  |
|  +-------------------------------------------------------+  |
+-------------------------------------------------------------+
```

6.5 Entry history

```
+-------------------------------------------------------------+
|  History                                      [ + New ]     |
|  [ filter by tag  v ]                                       |
+-------------------------------------------------------------+
|  +-------------------------+  +-------------------------+   |
|  | entry                   |  | entry                   |   |
|  | date                    |  | date                    |   |
|  | [edit] [delete]         |  | [edit] [delete]         |   |
|  +-------------------------+  +-------------------------+   |
+-------------------------------------------------------------+
```

6.6 Settings

```
+-------------------------------------------------------------+
|  Settings                                                   |
+-------------------------------------------------------------+
|  Data                                                       |
|  [ Export all data ]                                        |
|  [ Delete all data ]   (danger)                             |
+-------------------------------------------------------------+
|  Account                                                    |
|  signed in as user@example.com                [ Log out ]   |
+-------------------------------------------------------------+
```

7. Responsive notes

- The main column is capped at max-w-6xl and widens to max-w-7xl on large screens, to keep reading comfortable.
- The navigation rail collapses on desktop and becomes shortcut cards on mobile.
- Summary cards sit in three columns on large screens and one column on mobile.
- Long tables and lists scroll inside their own frame, so the page structure is never pushed out of shape.

8. Accessibility notes

- Every key interaction works by keyboard, per NFR-04.
- Status messages use an alert region a screen reader can reach.
- Main colour pairs meet WCAG 2.1 AA contrast.
- The delete confirmation separates the destructive button from cancel, and closes with Escape.
