Stakeholder Register and Power/Interest Matrix: RAG-Diary

> Identifies every stakeholder, groups them by power and interest, sets an engagement strategy, and assigns RACI for the key decisions of version 1.0.

> Thai version: STAKEHOLDER-MATRIX.md

1. Document control

Item	Detail
Document	Stakeholder Register and Power/Interest Matrix
Version	1.0
Prepared	15 October 2026
Author	Business Analyst / System Analyst (project owner)
Status	Reviewed, round 1 (25 October 2026)
Related documents	PRODUCT-BRIEF, SRS, TRACEABILITY-MATRIX

2. Purpose and scope

This document answers one question: who has a stake in RAG-Diary, who decides, how interested is each person, and how do we engage them? It gives requirement elicitation, approval and change management a clear owner.

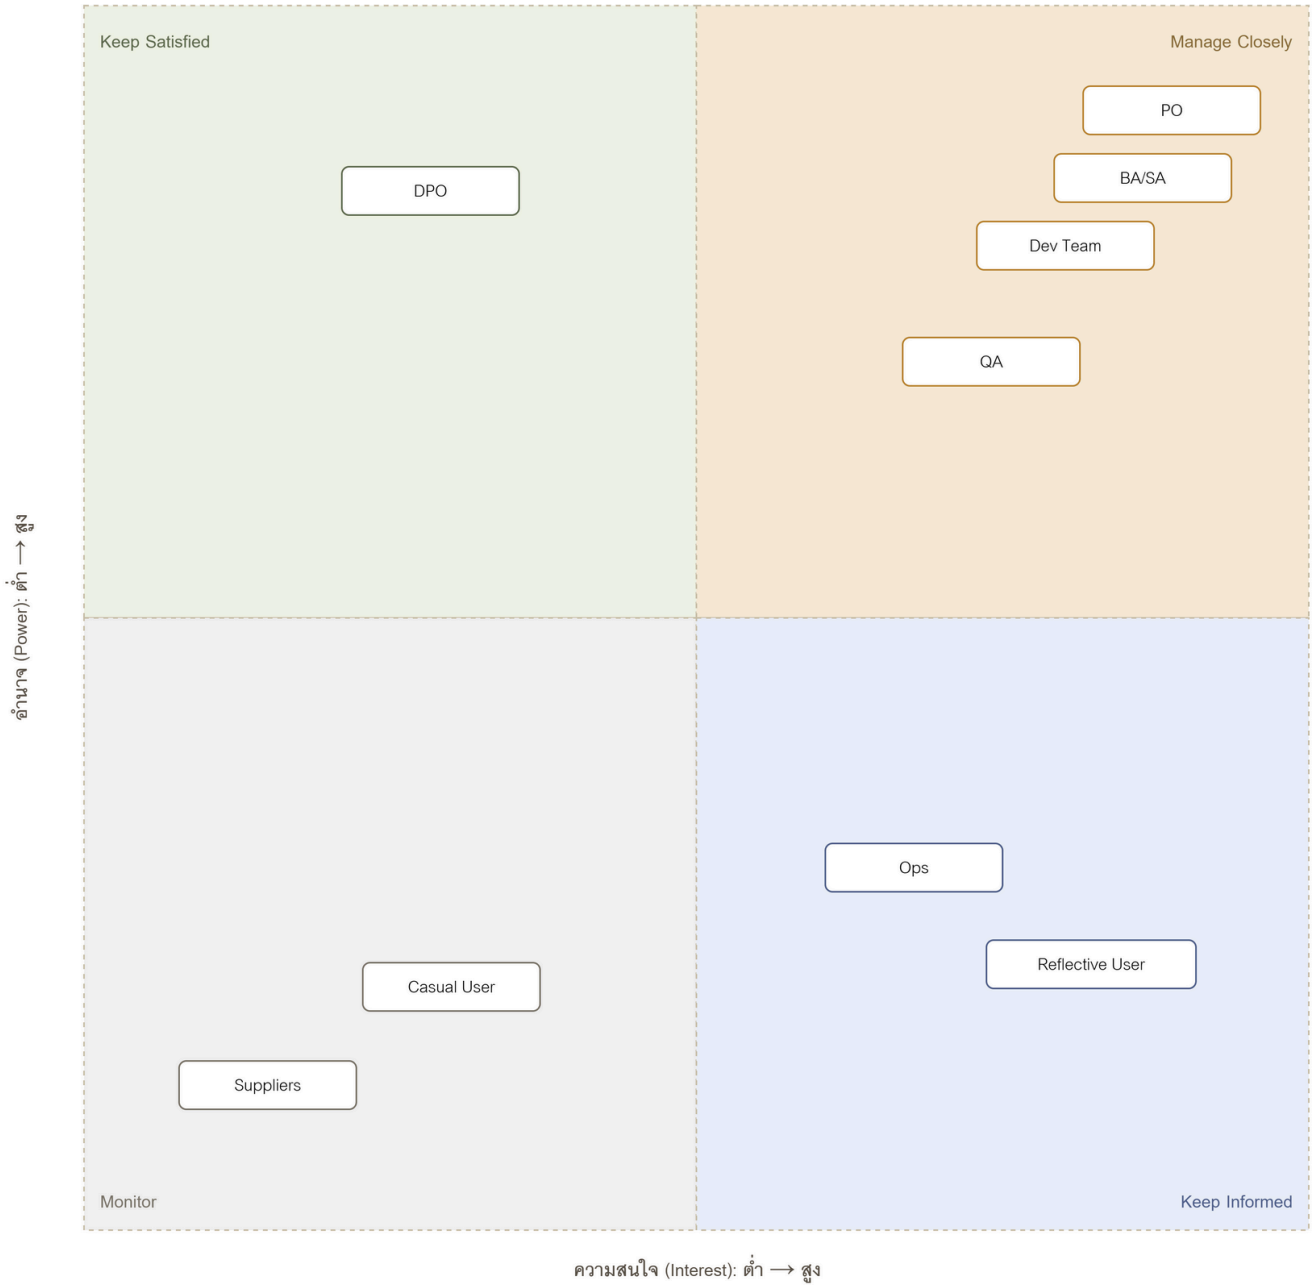

Scope: the stakeholder register, the power and interest grouping, the engagement strategy, the communication plan, and RACI for the main decisions. Out of scope: functional requirement detail (in the SRS) and risk detail (in the Risk Register).

3. Stakeholder register

ID	Stakeholder	Type	Role	Interest	Power	Stance	Main concern
SH-01	Product Owner / Sponsor	Internal	Sets direction and scope	High	High	Supportive	Value delivered to users and return on the investment

ID	Stakeholder	Type	Role	Interest	Power	Stance	Main concern
SH-02	End user: occasional diarist	External	Uses it now and then	Low	Low	Neutral	Ease of writing, not losing time, and keeping fun moments as images
SH-03	End user: long-term diarist and reviewer	External	Uses it regularly	High	Low	Supportive	Real retrieval, keeping important moments, and safe data
SH-04	Development team	Internal	Builds and designs the technical side	High	High	Supportive	Clear requirements and technical feasibility
SH-05	QA / Tester	Internal	Tests and assures quality	High	High	Neutral	Acceptance criteria that can be measured and executed
SH-06	Data Protection Officer (DPO)	Internal	Governs personal data	Low	High	Neutral	Sending sensitive data to an external provider
SH-07	Ops / DevOps	Internal	Deploys and monitors	High	Low	Supportive	Availability, cost and system monitoring
SH-08	External service providers (Supabase, Google Gemini)	External	Provide infrastructure and AI	Low	Low	Neutral	Use within their terms and price limits
SH-09	Business Analyst / System Analyst	Internal	Elicits, analyses and documents	High	High	Supportive	Clear requirements and full traceability

4. Power/Interest matrix (Mendelow)

Group	Stakeholders	Strategy
Manage closely (high power, high interest)	SH-01 PO, SH-04 Dev, SH-05 QA, SH-09 BA/SA	Engage closely; collect requirements and objections before every approval
Keep satisfied (high power, low interest)	SH-06 DPO	Keep satisfied by flagging data issues early and asking for a view when relevant
Keep informed (low power, high interest)	SH-03 long-term user, SH-07 Ops	Report progress regularly to keep support and collect feedback
Monitor (low power, low interest)	SH-02 occasional user, SH-08 suppliers	Watch as appropriate; no need to invest heavily in communication

5. Engagement strategy

ID	Engagement goal	How	Effort
SH-01	Get direction and scope approval quickly	Short, focused review and approval meetings	High
SH-02	Keep it simple enough that people do not abandon it	Learn from real use, focus on simplicity	Low
SH-03	Get deep feedback on retrieval and privacy	In-depth interviews and testing with real users	High
SH-04	Requirements clear enough to estimate	Review requirements with the development team before building	High
SH-05	Acceptance criteria that can be executed	Agree the acceptance criteria in the SRS from the start	High
SH-06	Personal data compliant with the PDPA	Ask for a view before designing the outbound data path	Medium
SH-07	Smooth deployment with cost under control	Readiness meeting before go-live	Medium
SH-08	Use within terms, with cost controlled	Track usage volume and service limits	Low
SH-09	Connect stakeholder needs to requirements and design	Produce, review and share documents with the team regularly	High

6. Communication plan

Stakeholder	What is communicated	Channel	Frequency	Owner
SH-01 PO	Status, scope and decisions needed	Short review meeting	At every significant decision	BA/SA
SH-03 Long-term user	User test results and feedback	Summary report	After each test round	BA/SA
SH-04 Dev	Requirements and technical objections	Work board and meetings	Weekly	BA/SA
SH-05 QA	Acceptance criteria and the test set	Documents and meetings	Before testing starts	BA/SA
SH-06 DPO	Personal data issues and consent	Written opinion	When the data path changes	BA/SA
SH-07 Ops	Deployment plan and monitoring requirements	Readiness meeting	Before go-live	Dev
SH-02 Occasional user	Changes that affect ease of use	In-product channel and short survey	When a significant change lands	BA/SA

Stakeholder	What is communicated	Channel	Frequency	Owner
SH-08 Suppliers	Terms, price and service changes	Provider announcements	When a provider announces a change	Ops

7. RACI matrix

A = accountable for the outcome, R = responsible for the work, C = consulted, I = informed.

Decision	SH-01 PO	BA/SA	SH-04 Dev	SH-05 QA	SH-06 DPO	SH-07 Ops	SH-08 Suppliers
D1 Approve the MVP scope	A	R	C	C	I	I	-
D2 Approve the NFR targets	A	R	C	C	C	C	-
D3 Choose the AI provider and outbound data policy	A	R	C	-	C	I	I
D4 Data retention and deletion policy	C	R	C	I	A	C	-
D5 Accept the system (UAT sign-off)	A	C	C	R	I	I	-
D6 Approve go-live	A	I	C	C	-	R	-

8. Assumptions and ownership

- This is a self-initiated project that was actually built. The author takes the Product Owner and BA/SA roles together.
- The other roles (Dev, QA, DPO, Ops) simulate how a team works, to reflect a real analysis process. They are not a real team of individuals.
- External providers are treated as supplier stakeholders, because they affect cost limits and privacy.
