User Acceptance Test (UAT): RAG-Diary

> The acceptance test plan, so users confirm the system solves their real work across use cases UC-01 to UC-06, with acceptance criteria and a sign-off table.

> Thai version: UAT.md

1. Document control

Item	Detail
Document	User Acceptance Test Plan
Version	1.0
Prepared	15 October 2026
Author	Business Analyst / System Analyst (project owner)
Status	Reviewed, round 1 (25 October 2026)
Related documents	USE-CASES, USER-STORIES, TEST-PLAN, TRACEABILITY-MATRIX

2. Purpose and scope

Acceptance testing lets users confirm that the core functions do what they need before the system is treated as ready.

Scope: acceptance scenarios tied to use cases, acceptance criteria, and sign-off. Out of scope: technical and load testing (in TEST-PLAN).

3. Participants and roles

Role	Responsibility in UAT
PO	Represents the user, runs the scenarios and gives the verdict
QA	Prepares data, records results and confirms defects
Dev	Watches and fixes defects found during the test

The team is described by role rather than by name, so the document stays about responsibility.

4. Acceptance scenarios

ID	Scenario	Use case	Acceptance criteria
UAT-01	Create an account and log in	UC-01	The user can sign up and get in, and the system rejects invalid input
UAT-02	Write a new entry with a tag	UC-02	The entry is created and appears in the list immediately
UAT-03	View, edit and delete an entry	UC-03	Edits and deletions are reflected correctly in the list
UAT-04	Search and chat with the entries	UC-04	Answers are grounded in the user's entries and easy to read
UAT-05	Mood summary and illustration	UC-05	The summary and image convey the mood of the entries
UAT-06	Export and delete all data	UC-06	The export file is complete and the data is really gone
UAT-07	Consent before AI features and withdrawal	NFR-03, BR-06	The system informs and asks for consent before sending data, and consent can be withdrawn in settings

5. Overall acceptance criteria

The system is accepted when every UAT scenario passes and no critical or high defects remain open.

6. Result log

ID	Tester (role)	Date	Result	Note
UAT-01	PO		Awaiting test	
UAT-02	PO		Awaiting test	
UAT-03	PO		Awaiting test	
UAT-04	PO		Awaiting test	
UAT-05	PO		Awaiting test	
UAT-06	PO		Awaiting test	
UAT-07	PO		Awaiting test	

7. Sign-off

Role	Name (role)	Verdict	Date
Product Owner	PO		
Quality Assurance	QA		
Business Analyst	BA
